

Everything Ntamara Studio offers, in one document.

Ntamara Studio builds websites for businesses in Uganda. You see the price. You pay half. Three days later you are online, on a domain in your own name.

What you get

The offer is fixed. You know all of it before you pay anything.

- **A five page website, built in three working days.** The three days start when your deposit clears and your details are in. Your site is ready to review by the end of the third working day.
- **You pay half to start and half on approval.** The deposit is 350,000 shillings and the balance is 250,000 shillings. You pay the balance only after you have seen the finished site.
- **The domain and every password are yours.** The domain is registered in your name on the first day. On the day the site goes live you receive every file, every password, and full access to your hosting.

The three tiers

Launch 600,000 shillings

Pay 350,000 shillings to start and 250,000 shillings when you approve it.

A static website of up to five pages. Every page is built and set, and you send us the changes you want.

- Up to five pages, built and styled for your business
- Reads well on every phone, checked on a real low cost Android
- Two designs to choose from

[Start your website](#)

- Set up so Google can list you
 - Your domain, in your name, for the first year
 - Every file and password handed to you at launch
 - Small fixes are free for the first 30 days
 - We make your content changes for you when you need them
-

Platform 1,200,000 shillings

Pay 700,000 shillings to start and 500,000 shillings when you approve it.

A dynamic website you run yourself. You add and edit your own words, pictures and posts without calling us.

- Everything in Launch
 - An editor where you change your own text, images and posts
 - One working feature: a blog, a booking request form, or a product catalogue
 - More pages wherever your business needs them
 - A staff sign in, if your feature needs one
-

Platform Plus from 3,000,000 shillings

Pay half to start and half when you approve it.

A web application with accounts, a database and its own logic. For a booking system, a member portal, a directory, or an internal tool.

- Everything in Platform
- Customer or staff accounts with secure sign in
- A database that holds your records and updates live
- The screens and rules your process needs, built to a written scope
- An admin area for your team

Every package includes your domain for the first year and full handover of the files and passwords.

How the build runs

1. **Call.** A free 15 minute phone call. You leave it with a fixed price and a start date.

Start your website

3. **Pick your design.** Within about 48 hours you get two designs for your home page. You pick one.
4. **Go live.** You review it once, pay the balance, and we hand you every file and password.

The promises

- **Three days, or we pay you back for the wait.** Your site is ready to look at within 3 working days of your deposit clearing and your form being complete. If we are late for a reason on our side, your next pass of changes is free and we take 50,000 shillings off your balance for every extra working day, up to 150,000.
- **You own the site, not us.** The domain is registered in your name on day one. When you pay the balance you get every password, every file, and full access to your hosting. You can move the site anywhere.
- **The price you see is the price you pay.** Half to start and half when you approve it. There is no hourly billing and no invoice you did not expect.
- **You pay the balance only after you approve the site.** We show you the finished site first. You pay the rest once it matches what we agreed.
- **Every payment is checked before anything moves.** We match your payment against our own bank alert or the Relworx dashboard before the next step starts, and we send you a receipt once it clears.

Changes after launch

- A minor change is content. Editing text, swapping an image, updating a price or opening hours, adding a staff member.
- A major change is structure. A new page, a new section, a layout change, a new feature, or rebuilding a page you already approved.
- Your first pass of minor changes, up to five, is free. It runs once, during your review.
- After that, a pass of minor changes is 50,000 shillings and a pass of major changes is 100,000 shillings. The fee is per pass, not per change. We tell you which a request is, and what it costs, before we start.
- On a care plan you get one pass of minor changes a month and two major changes a year, with no separate charge.

The care plan

- What we watch: the site stays up, loads fast, and keeps working on phones. We check it and act

Start your website

- What we fix: broken links, a form that stopped sending, a plugin or a certificate that needs renewing, and security patches.
- What we keep: a backup taken on a schedule, and a full restore if the site breaks or is compromised.
- What is included: on Basic, one pass of minor content changes a month, and on Unlimited, as many as you need. Both include two major changes a year. Basic replies within 48 hours, Unlimited within 24. Setting it up is free.

Basic is 300,000 shillings a year. Unlimited is 480,000 shillings a year. Setting it up is free.

Add ons

- Search setup: Included On every build. Not sold separately.
- Business email, as many addresses as you want: 50,000 shillings
- Logo and branding: 500,000 shillings
- We write the words for your site: 200,000 to 500,000 shillings Quoted on your call.
- One written article: 60,000 shillings
- Photography, half a day: 500,000 to 1,500,000 shillings Quoted on your call.
- Moving a domain you already own to us: 100,000 shillings

Paying

Two ways to pay: Mobile Money through Relworx, or a bank transfer to Equity Bank. Both need proof before the next step starts.
